

iPIMM™ CCM KIOSK

iPIMM™ CCM KIOSK Solutions

Procuco's iPIMM™ CCM KIOSK solutions provide a simple and secure environment for cold storage warehouse personnel to share our mobile platforms amongst drivers, janitors, loaders, unloaders and visitors.

Each module will operate in “KIOSK” mode on any Apple iPad, restricted by user permissions tied to a specific module. For example, “Janitors” will only have access to the “cleaning and sanitation inspection forms in the Audits & Inspection module while “Driver” will be restricted to punch-in and punch-out forms in the Driver Time & Attendance module.

iPIMM™ CCM KIOSK supports the following modules:

Audit & Inspections

Facility Audits and Inspections including nightly cleaning services.

Calibration

Calibrate temperature probes used for Inspections, product pulping, FSMA, etc.

Dispatch

Resource assignment of Tractors, trailers, drivers, routes, etc.

Driver Time & Attendance

Time Clock to support Driver Punch-in and Punch-out.

Facility Monitoring

Alert Notifications of temperature violations by zone i.e. Cooler, Freezer, Tomato Room, etc.

Load Dock (Outbound including FSMA)

Outbound Loading Process, including FSMA compliance for Loaders.

Supplier Delivery (Inbound including FSMA)

Inbound Unloading Process, including FSMA compliance for Unloaders.

Visitor Sign-in

Visitor Sign-in Log for Drivers, Visitors, Vendors, etc.
